About me

An Enthusiastic FNB DevOps intern. I am a Systems Development Graduate from Boston Business College and am passionate about I.T. I have good technical abilities with a firm grasp of how ICT can be used to build and develop solutions that benefit businesses and society as a whole. I bring diverse approaches with a solid theoretical foundation in developing and maintaining information technology systems. I expertise in the areas of Database, DevOps and a App Development. I value interpersonal relations and have a positive outlook on life. I see myself as valuable asset in I.T, with the ability to interact with individuals from different cultural backgrounds.

Achievements & Key Projects

- Build a simple calculator app using java
- Created a diary app on android studio. Used java and SQL Lite to store user details.
- Certified AWS Cloud Practitioner
- Built a Covid-19 tracking register app that captures details of user's contact information and checks their temperatures. Used Java Swing components and MySQL community server to store user's information.
- Collaborated on creating an E-learning platform that focuses on teaching in Accounting, Mathematics and Physical Science. Using HTML, CSS, Bootstrap, JavaScript and firebase

Work Experience

- DevOps intern at Capaciti Tech Career Accelerator. 2023-2024
- FNB DevOps Intern. 2024-2025
